

Bobsled Races

Jump into the top entertaining race of your life.

Your new snow discovery In clean air and silence

Bobsla is a new kind of electric snowmobile, in the form of a plastic bob and electric tracks.

Bobsla rather sails in the snow than just rides. Bobsla drives more efficiently more Bobsla and accelerates faster.

The body is at the same time a plastic sled sliding on the snow. This provides great maneuverability and drift capability.

The driver is in just centimeters from the snow - there is no risk of overturning and a sharp feeling of speed.

As snow should stay clean!

Instant energy and exhaust-free acceleration, fingertip control, keen sense of speed, crisp reactions and drift

Tages Anzeiger 2020 – *Tops Swiss wintersport news: ... Bobsla is Marsmobile...*

ISPO 2020 – Slopes and Parks. Selection 2020: *At first glance, Bobsla might seem clumsy. Until the driver accelerates.*

Prowinter 2019 – Auditorium Award
Snowriders 2021 – *Forget go-karts, these snow-karts are wild!*

and many more other publications worldwide.

Bobslea electric sled

No risk but fun

In 2019-2022
Thousands rides;
Dozens colisions;
Zero injuries!

Safety belt & rollover cage

All-side-protection from collisions with other vehicles

Speed is perceived faster than it actually is

Amazing feelings and videos to share

Target Group

Instant snowfun without long training

Bobsled units skiers, relaxing after day of riding, and their non-skiing friends or families

Not only young, not only males

The simple as computer game, but outdoor.

Safe races show huge potential for large inclusion of young and seniors in the same challenge – great fun, common activity with sharp training of brain

New attraction point
For your guests

Advertising for you

Bobslla GmbH keeps R&D and proactive media policy attracting to our partners to ride

Frequently asked questions

1. What is max speed? *We limit speed as 30 km/h*
 2. What is max range / time? *With current batteries the range is 25 km or one hour*
 3. What is charging time? *1.5 hours*
 4. Does it go in cold days? *No impact till -25C. We tested it in -21 C / after overnight staying in cold - you can ride full speed instantly from the start.*
 5. What certificates? *CE declaration to European standards of low-voltage equipment. Not road-legal but can be used on your private areas under operator control.*
 6. What risks I have? *We do our best to reduce possible injuries. Our customers' experience - a few accidents on track, but NO injuries. Drivers are to sign a disclaimer - run at their own risk, understanding racing rules. We offer it for 18+.*
- How much does it cost? *Please contact us and let us know – what is your resort. We will be happy to make our best offer for You!*

Updates in 2022/2023:

New development, New experience

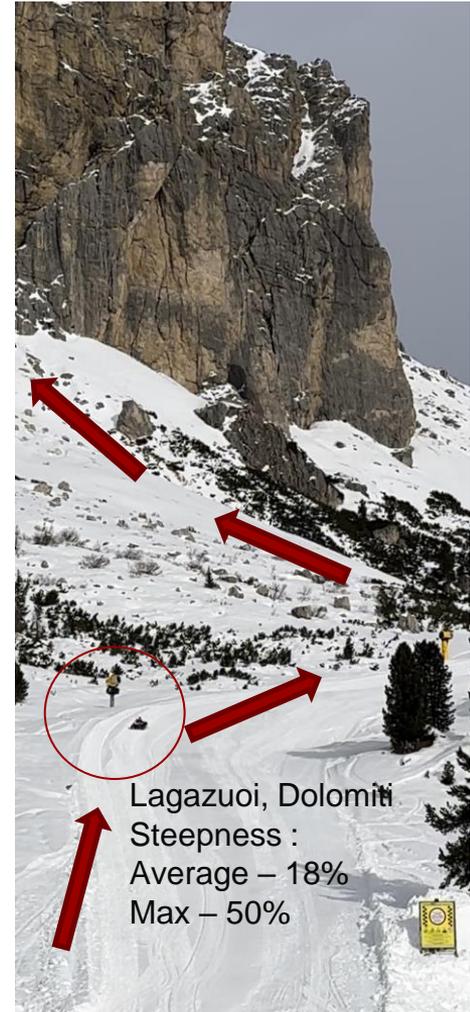

New wider track (9 inches VS 7 inches)-
Better performance on soft snow
More smooth driving
Better drift
Better outlook and the same energy efficiency!

New power to steep riding – tested in Dec.2022

Improvements for riding in warm winter days

The first 2 deliveries to Canada (3 vehicles)
New experience in packing, paper formalities
and freight forwarding

Faster assembling and faster deliveries

What we want:

We deliver new snow fun:

- ✓ Your guest will love it
- ✓ Your business will benefit
- ✓ Our Nature will be protected!
